

Winter Freeze

When the weather drops below freezing:
Avoid any serious damage to your home and
personal belongings caused by frozen pipes bursting.

WHAT YOU NEED TO DO:

- Let your kitchen and bath faucets drip on **COLD**, with stoppers **OPEN**.
- Keep your thermostat heat above 65 Degrees.
- Leave cabinet doors under bathroom and kitchen sink **OPEN** to keep warm air circulating around your water pipes.
- Remember to **COVER** outside water spickets with a faucet cover or wrapping.

With your help, this winter can pass without any inconvenience from freezing weather!
